Bylaws & Policies

8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well being of the District's students. Furthermore, research concludes that there is a positive correlation between a student's health and well being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
 - 1. Nutrition education shall be included in the health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
 - 2. Nutrition education may include enjoyable, developmentally appropriate and participatory activities, such as contests, promotions, taste testing, and others.
 - 3. Nutrition education posters, such as the Food Pyramid Guide, will be displayed in the cafeteria.
 - 4. Nutrition education standards and benchmarks promote the benefits of a balanced diet that includes fruits, vegetables, whole grain products, and low-fat and fat-free dairy products.
- B. With regard to physical activity, the District shall:
 - 1. **Physical Education**
 - a. All students in grades K-8, including those with disabilities, special health care needs and in alternative educational settings (to the extent consistent with the students' IEPs), shall receive instruction in physical education for at least thirty (30) minutes two (2) days per week for the entire school year.
 - b. Physical education classes shall provide students with opportunities to learn, practice, and be assessed on developmentally appropriate knowledge, attitudes and skills necessary to engage in lifelong, health-enhancing physical activity.

- c. Planned instruction in physical education shall teach cooperation, fair play, and responsible participation.
- d. Planned instruction in physical education shall meet the needs of all students, including those who are not athletically gifted.
- e. Planned instruction in physical education shall include cooperative as well as competitive games.
- f. Planned instruction in physical education shall promote participation in physical activity outside the regular school day.

2. **Physical Activity**

- a. Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.
- b. The school shall encourage families and community organizations to institute programs that support physical activity.
- c. All students in grades 7 - 8 shall have the opportunity to participate in interscholastic sports programs.

C. With regard to other school-based activities the District shall:

- 1. The schools shall provide at least fifteen (15) minutes daily for students to eat.
- 2. The schools shall schedule mealtimes so there is minimum disruption by bus schedules, recess, and other special programs or events.
- 3. Students, parents, and other community members shall have access to, and be encouraged to use, the school's outdoor physical activity facilities outside the normal school day.
- 4. The schools may provide opportunities for staff, parents, and other community members to model healthy eating habits by dining with students in the school dining areas.
- 5. Schools in our system utilize a non-identifiable student payment system, therefore, eliminating any stigma or identification of students eligible to receive free and/or reduced meals.

D. With regard to nutrition promotion, the District shall:

- 1. encourage students to increase their consumption of healthful foods during the school day;
- 2. create an environment that reinforces the development of healthy eating habits, including offering the following healthy foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards:
 - a. a variety of fresh produce to include those prepared without added fats, sugars, refined sugars, and sodium;
 - b. a variety of vegetables daily to include specific subgroups as defined by dark green, red/orange, legumes, and starchy;
 - c. whole grain products - half of all grains need to be whole grain-rich upon initial implementation and all grains must be whole grain-rich within two (2) years of implementation;
 - d. fluid milk that is fat-free (unflavored and flavored) and low-fat (unflavored);
 - e. meals designed to meet specific calorie ranges for age/grade groups;

- f. limit trans-fat from school meals.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy **8500**, entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages as well as to the fiscal management of the program.
- B. As set forth in Policy **8531**, entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).
The sale of foods of minimal nutritional value in the food service area during the lunch period is prohibited.
- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.
- D. Most food items and beverages available for sale to students for consumption on the school campus (any area of property under the jurisdiction of the school that is accessible to students during the school day) between midnight and thirty (30) minutes after the close of the regular school day shall comply with the current USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, including, but not limited to, competitive foods that are available to students a la carte or as entrees in the dining area (except entree items that were offered on the National School Lunch Program (NSLP) or School Breakfast Program (SBP) menu on the day of and the day after they are offered on the NSLP or SBP menu), as well as food items and beverages from vending machines, from school stores, or as fund-raisers, including those operated by student clubs and organizations, parent groups, or boosters clubs.
- E. The school food service program may involve students, parents, staff, and/or school officials in the selection of competitive food items to be sold in the schools.
- F. Continuing professional development shall be provided for all staff of the food service program.

The Board designates the Superintendent as the individual charged with operational responsibility for verifying that the District meets the goals established in this policy.

The Superintendent shall appoint a district wellness committee every three (3) years that includes parents, students, representatives of the school food authority, educational staff (including physical education teachers), school health professionals, members of the public and school administrators to oversee development, implementation, evaluation and periodic update of the wellness policy. The Wellness Committee shall be an ad hoc committee with members recruited and chosen annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's wellness policy;
- C. presentation of the wellness policy to the school board for approval;
- D. measurement of the implementation of the policy;

E. recommendation for the revision of the policy, as necessary.

Before the end of each third school year the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall distribute information at the beginning of the school year to families of school children and include information in the student handbook.
